Nature and influence of the problems. Hilbert's problems ranged greatly in topic and precision. Some of them are propounded precisely enough to enable a clear affirmative or negative answer, like the 3rd problem, which was the first to be solved, or the 8th problem (the Riemann hypothesis). For other problems, such as the 5th, experts have traditionally agreed on a single interpretation, and a ...

Packing problems are a class of optimization problems in mathematics that involve attempting to pack objects together into containers. The goal is to either pack a single container as densely as possible or pack all objects using as few containers as possible. Many of these problems can be related to real life packaging, storage and transportation issues.

The following analysis reveals a comprehensive look at the Storyform for Blade Runner. Unlike most of the analysis found here—which simply lists the unique individual story appreciations—this in-depth study details the actual encoding for each structural item. This also means it has been incorporated into the Dramatica Story Expert application itself as an easily referenced contextual example.

There is a large body of literature on conflict, as conflict has been identified to be a major aspect of organizational behavior and management (Rahim 1983, Wall & Callister, 1995). Wall and Callister (1995, 517) define conflict as "a process in which one party perceives that its interests are being opposed or negatively affected by another party".

Our analysis of the Army's new missions calls attention to the kinds of skills that are needed to conduct them effectively. In this chapter, we identify the combat and contact skills needed for peacekeeping and operations other than war (OOTW) activities, then review current military training programs for the applicability of their skills training to mission requirements.
