Indian mathematics emerged in the Indian subcontinent from 1200 BC until the end of the 18th century. In the classical period of Indian mathematics (400 AD to 1200 AD), important contributions were made by scholars like Aryabhata, Brahmagupta, Bhaskara II, and Varāhamihira. The decimal number system in use today was first recorded in Indian mathematics. ...

Article Summary: "It is safe to say that the benefits of understanding patterns open many doors where this knowledge can be applied. Of course, that is a commonality with all forms of learning mathematical logic: there is a deep application that can be provided that we often do not realize when we first study the material."

So the change in population is 9,000. The percentage of population loss is just the change in population divided by the original population. Turn 0.134 into a percent so that we get 13.4%. So the percent of population loss is 13.4%. To find the percent decrease, we need to calculate the difference ...
