PhET: Free online physics, chemistry, biology, earth ...

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

Introduction. The year 2003 marked the 50th anniversary of the historic characterization of DNA by James Watson and Francis Crick with an article in the journal Nature on April 25, 1953, that revealed the structure of DNA (Watson and Crick, 1953). Their discovery was the culmination of a decade of intense research following Oswald T. Avery, Colin MacLeod, and Maclyn McCarty's demonstration that ...

You missed the mark a bit there. You pointed out that, "Intelligence is not equal throughout the races. Examples of this are evident in the inventiveness of a particular group, what technologies they create, the societal structure they create, their art and their sciences", a statement which in and of itself is a contradiction.

How many major races are there in the world? - World ...

What causes the fresh smell we experience just before the onset of a storm or shower of rain, which is especially noticeable after an extended dry spell?

Last Word Archive | New Scientist

Representing 1, 2 and 3 in as many lines as the number represented worked well. [citation needed] The Brahmin Indians simplified 4 by joining its four lines into a cross that looks like the modern plus sign. The Shunga would add a horizontal line on top of the numeral, and the Kshatrapa and Pallava evolved the numeral to a point where the speed of writing was a secondary concern.
