In the early-to-mid 20th century, researchers developed various scaling methods to measure the relative strength or degree of psychological phenomena, such as mental abilities and attitudes. 17

As Stevens put rather simply, scaling was a process to assign a number to objects using some rule. 16 Through defining measurement scales, any phenomenon could be "quantified."

When I decided to start a blog, I wanted to devote a section of it to ideas that are popular in modern Christendom but are simply not true. I call these "Christian Myths," and you can see the ones I have written about so far. Interestingly enough, one of those articles (Laminin Shaminin) is the most common article on this blog that people find via search engines.
