A biofuel is a fuel that is produced through contemporary biological processes, such as agriculture and anaerobic digestion, rather than a fuel produced by geological processes such as those involved in the formation of fossil fuels, such as coal and petroleum, from prehistoric biological matter. If the source biomatter can regrow quickly, the resulting fuel is said to be a form of renewable ...

Biofuel - Wikipedia

Article Summary: Preparing a wet mount of a specimen is the technique typically used to view plant and animal cells using a microscope. This page provides step by step instructions on slide preparation as well as videos at the bottom of page.

How to Prepare a Wet Mount Slide of Eukaryotic Cells

Purpose. To introduce students to the amazing variety of life around them. Context. In this lesson, biodiversity is introduced by having students identify and talk about what they know about the various habitats around them, including the amazing variety of life.
