Answers with explanation for Valusia County Bio EOC Exam download from Mr. Allen's page. You MUST write out the exact answers as I have written them here.

Answer Key - Mr. Allen's Biology Class

Unique Animal, Plant and Bacteria Characteristics. For life all cells have basic needs. Cells have diverged in their structure and function to accommodate these survival requirements.

Interactive Cell Models - CELLS alive

Mitochondria - Turning on the Powerhouse Mitochondria are known as the powerhouses of the cell. They are organelles that act like a digestive system which takes in nutrients, breaks them down, and creates energy rich molecules for the cell. The biochemical processes of the cell are known as cellular respiration. Many of the reactions involved in cellular respiration happen in the mitochondria.

Cells Lab - Students will love you for providing them with a hands-on experience when learning about plant and animal cells. The Cells station lab is a plug and play unit that is meant to accompany my FREE Kesler Science Station Lab Series. Download that start-up guide to learn more about how to use...

Cells Student-Led Station Lab by Kesler Science | TpT

The cells of the blood are important because they are a readily accessible population whose morphology, biochemistry, and ecology may give indications of a patient's general state or clues to the diagnosis of disease.

Histology - Yale University

The nervous system is extraordinarily complex, and it is therefore impossible to cover it in its entirety in a single laboratory. This lab will be limited to the study of the basic features of neurons and glial cells - specific organs composed of neurons, including the retina of the eye and the organ of Corti of the inner ear, will be studied in the Sensory Systems lab, in conjunction with the ...

Histology - Yale University

β -galactosidase, also called lactase, beta-gal or β -gal, is a glycoside hydrolase enzyme that catalyzes the hydrolysis of β -galactosides into monosaccharides through the breaking of a glycosidic bond. β -galactosides include carbohydrates containing galactose where the glycosidic bond lies above the galactose molecule. Substrates of different β -galactosidases include ganglioside GM1 ...
