1. Introduction. Diagenesis refers to the physical and chemical changes that occur during conversion of sediment into sedimentary rock. The prefix dia- and root -genesis are both from Greek and mean "through" or "across" and the "origin or mode of formation", respectively. Together, they refer to the formation of a sedimentary rock through its entire volume.

Of main interests to us is the use of mining as a part of in-situ resource utilization, that is: making it easier to industrialize and colonize space by removing the need to pay the sky-high delta-V cost of lugging raw materials up Terra's gravity well.. But in the early stages, asteroid mining start-ups cannot be established to provide minerals to space industrialization because there won't ...
