It should be unnecessary to keep re-assigning this key-event every time the selection changes.

Obviously, I'm not aware of what your code actually does, but perhaps this key assignment could be made, and removed, on the sheet's Activate and Deactivate events. – Andy G Jun 30 '13 at 16:50

The Biology Project, an interactive online resource for learning biology developed at The University of Arizona. The Biology Project is fun, richly illustrated, and tested on 1000s of students. It has been designed for biology students at the college and high school level, but is useful for medical students, physicians, science writers, and all types of interested people.

The Biology Project

Without reference to the original problem (which I suspect is long since solved), I very recently discovered a neat trick that makes the Choose function work exactly like a select case statement without any need to modify data. There's only one catch: only one of your choose conditions can be true at any one time.

Handouts, questionnaires and other leaflets. In my 'consulting room' I have two big magazine style racks on the wall (see below). Each rack has eleven compartments, and each compartment contains 10 to 20 different A4 sheets of questionnaires, information leaflets, Powerpoint miniatures, and other handouts (300 to 400 items in all).

AT THE LAB: First: A fasting blood glucose test is done. This is a simple blood test that checks your blood sugar before you drink the glucose drink. Next: The lab technician will tell you to drink the glucose drink. It will taste very sweet. It's important to drink the whole amount fairly quickly.
