The earliest use of statistical hypothesis testing is generally credited to the question of whether male and female births are equally likely (null hypothesis), which was addressed in the 1700s by John Arbuthnot (1710), and later by Pierre-Simon Laplace (1770s).. Arbuthnot examined birth records in London for each of the 82 years from 1629 to 1710, and applied the sign test, a simple non ...

1. Introduction. Analytical chemists have to decide almost daily on the statistical equality of the slopes of two regression straight lines (in short, calibration or, best, standardization lines). This has many relevant practical implications in, for instance, quality control (to ascertain the stability of a device, to set a calibration time delay, etc.), method comparison studies (to assess ...
