Information is the resolution of uncertainty; it is that which answers the question of "what an entity is" and thus defines both its essence and nature of its characteristics. Information relates to both data and knowledge, as data is meaningful information representing values attributed to parameters, and knowledge signifies understanding of a concept.

Some discoveries are just too shocking to digest. Recently I wrote of intrepid Ron Unz, the Californian maverick publisher and IT-genius, who dared to share with his readers his insights into the ideas and motifs of revisionists, or Holocaust Deniers, as their enemies call them. But this absolutely verboten topic fades into irrelevance in comparison with his most momentous discovery that has ...
