6. This brings us to the evolution of one of the two main state variables in our framework, political institutions (the other state variable is the distribution of resources, including distribution of physical and human capital stocks, etc.). Political institutions and the distribution of resources are the state variables in this dynamic system because they typically change relatively slowly ...

The third major route for catabolism of pyruvate leads to ethanol. In some plant tissues and in certain invertebrates, protists, and microorganisms such as brewer's yeast, pyruvate is converted anaerobically into ethanol and CO₂, a process called alcohol (or ethanol) fermentation (Fig. 14-3).. The focus of this chapter is catabolism, but pyruvate has other, anabolic, fates.
