COMMON BIRDS OF KEY LARGO AND THE UPPER KEYS

The evolution of mammals has passed through many stages since the first appearance of their synapsid ancestors in the Pennsylvanian sub-period of the late Carboniferous period. By the mid-Triassic, there were many synapsid species that looked like mammals. The lineage leading to today's mammals split up in the Jurassic; synapsids from this period include Dryolestes, more closely related to ...

Mammal, (class Mammalia), any member of the group of vertebrate animals in which the young are nourished with milk from special mammary glands of the mother. In addition to these characteristic milk glands, mammals are distinguished by several other unique features. Hair is a typical mammalian feature, although in many whales it has disappeared except in the fetal stage.

mammal | Definition, Characteristics, Classification ...

Short-eared Owls eat mostly small mammals, especially mice and voles. These owls also eat shrews, moles, lemmings, rabbits, pocket gophers, bats, rats, weasels, and muskrats. Short-eared Owl populations tend to fluctuate in close association with the cycling populations of their mammalian prey. They ...
