Evidence of Evolution Background When Charles Darwin first proposed the idea that all new species descend from an ancestor, he performed an exhaustive amount of research to provide as much evidence as possible. Today, the major pieces of evidence for this theory can be broken down into the fossil record, embryology, comparative anatomy, and molecular biology.

I use the Mammal Powerpoint Presentation with this chart because there are some fantastic images of animals and short video clips that the students enjoy. This method does take some time though, plan for at least two days and perhaps more because students will ask a lot of questions and share stories about their own animal encounters.
