Sperm count is a key factor in fertility. Medications, alcohol, stress, and other influences can reduce sperm count and reduce fertility at the same time. Find out here about some home remedies ...

How to increase sperm count: 14 tips to boost fertility ...

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Evolution - Wikipedia

Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However, the choice of relevant soil attributes and interpretation of measurements are not straightforward, because of the complexity and site-specificity of soils, legacy effects of previous land use, and trade-offs between ecosystem services.

Soil quality - A critical review - ScienceDirect

The chromatophores are layered upon one another in the outer portion of the dermis. A layer of xanthophores (yellow pigment cells) erythrophores (reddish-purple pigment cells) and other fat-soluble pigment cells lay just under the basal membrane of the epidermal layer.

Glucose (also called dextrose) is a simple sugar with the molecular formula $C_6H_{12}O_6$. Glucose is the most abundant monosaccharide, a subcategory of carbohydrates. Glucose is mainly made by plants and most algae during photosynthesis from water and carbon dioxide, using energy from sunlight. There it is used to make cellulose in cell walls, which is the most abundant carbohydrate.

Glucose - Wikipedia

1. A nurse is performing an assessment interview with a patient. The patient tells the nurse that he has a type A personality. Home range studies demonstrate that while some snakes exhibit relatively sedentary behavior at times, activity levels even in such species may, for example, manifest a four-fold increase at other times (Brito, 2003). As such, even the more sedentary snakes manifestly use significant amounts space when there are appropriate opportunities to do so.
