Sources of atmospheric particulate matter. Some particulates occur naturally, originating from volcanoes, dust storms, forest and grassland fires, living vegetation and sea spray. Human activities, such as the burning of fossil fuels in vehicles, stubble burning, power plants, wet cooling towers in cooling systems and various industrial processes, also generate significant amounts of particulates.

Particulates - Wikipedia

1. Introduction. Diagenesis refers to the physical and chemical changes that occur during conversion of sediment into sedimentary rock. The prefix dia-and root -genesis are both from Greek and mean "through" or "across" and the "origin or mode of formation", respectively. Together, they refer to the formation of a sedimentary rock through its entire volume.

In severe cases of leptospirosis, several specialty consultations may aid in proper patient management. An infectious disease specialist may assist in differentiating leptospirosis from diseases with similar presentations but that may have significantly different treatments and in treating co-infections such as malaria, dengue, or others, depending on exposure history.
