Evolutionary biology is the subfield of biology that studies the evolutionary processes that produced the diversity of life on Earth, starting from a single common ancestor. These processes include natural selection, common descent, and speciation. The discipline emerged through what Julian Huxley called the modern synthesis (of the 1930s) of understanding from several previously unrelated ...

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Hi @Malachy...Dynamics CRM supports the three standard x-frame options i.e Deny, Same Origin and allow from. It seems by default it is set to Same Origin. When I changed the xframe option to allow from the website's origin (i.e the website which needs to frame it), the pages within the application i.e the out of the box framing within Microsoft dynamics CRM started throwing errors. I am unable to ...
