There are a number of volcanoes on Mars but none seem to be geologically active. Mars also has large canyons, dust storms, sand dunes, polar ice caps and other features similar to those found on Earth. Field Trip to Mars, Mars Features on Earth is a self-guided excursion to view various sites located on or near the central plateau of Washington that correlate to features found on Mars.

Kid's Cosmos: Facts about Mars

Scientists now have a fairly good understanding of how the plates move and how such movements relate to earthquake activity. Most movement occurs along narrow zones between plates where the results of plate-tectonic forces are most evident.
