Cell Wall - What's it for? Cell membranes surround every cell you will study. Cell walls made of cellulose are only found around plant cells and a few other organisms. Cellulose is a specialized sugar that is classified as a structural carbohydrate and not used for energy. If a plant cell is like a water balloon, the cell wall is like a cardboard box that protects the balloon.

Skeleton definition, the bones of a human or an animal considered as a whole, together forming the framework of the body. See more.

### **Skeleton | Definition of Skeleton at Dictionary.com**

Like the steel framework of a building, bones provide rigidity, which gives the body shape and supports the weight of the muscles and organs. Without this structure the body would collapse in on itself, compressing the lungs, heart and other organs--impairing their function.

### **What Are the Five Main Functions of the Skeletal System ...**

Muscle tissue is a soft tissue, and is one of the four fundamental types of tissue present in animals. There are three types of muscle tissue recognized in vertebrates: . Skeletal muscle or "voluntary muscle" is anchored by tendons (or by aponeuroses at a few places) to bone and is used to effect skeletal movement such as locomotion and in maintaining posture.

### **Muscle - Wikipedia**

Bones are efficient, sophisticated bundles of tissue, minerals, and water. Their jobs go well beyond basic skeletal framework. They are protective shells for vital organs such as the heart, the brain, and the spinal cord; they are scaffolding upon which muscles attach; and they are manufacturing centers for blood cells.

A theory is a contemplative and rational type of abstract or generalizing thinking, or the results of such thinking. Depending on the context, the results might, for example, include generalized explanations of how nature works. The word has its roots in ancient Greek, but in modern use it has taken on several related meanings.. Theories guide the enterprise of finding facts rather than of ...

Cortex. In a dissected kidney, it is easy to identify the cortex; it appears lighter in color compared to the rest of the kidney. All of the renal corpuscles as well as both the proximal convoluted tubules (PCTs) and distal convoluted tubules are found here. Some nephrons have a short loop of Henle that does not dip beyond the cortex. These nephrons are called cortical nephrons.
