In mathematics and physics, the centroid or geometric center of a plane figure is the arithmetic mean position of all the points in the figure. Informally, it is the point at which a cutout of the shape could be perfectly balanced on the tip of a pin. The definition extends to any object in n-dimensional space: its centroid is the mean position of all the points in all of the coordinate ...

It would probably be an understatement to say that dating is an important part of a teenager's life. In one study, researchers found that high school students consistently rated the time spent alone with an opposite-sex partner as the time when they were happiest and most satisfied with life. Therefore, as parents, how can you [...]
