Personality - Trait theories: Contemporary personality studies are generally empirical and based on experiments. While they are more precise, and thus may be more valid than much of psychoanalytic theory, experiments perforce have a narrower scope than the grand sweep of psychoanalysis. In the 1940s many investigators focused on intensive studies of individual traits and of combinations of ...

Anhedonia is a diverse array of deficits in hedonic function, including reduced motivation or ability to experience pleasure. While earlier definitions of anhedonia emphasized the inability to experience pleasure, anhedonia is used by researchers to refer to reduced motivation, reduced anticipatory pleasure (wanting), reduced consummatory pleasure (liking), and deficits in reinforcement learning.
