The gale was by no means confined to the waters off North Wales, nor would the Royal Charter be the only loss, as this storm continued on for a further two or three days (Fitzroy, Weather Book 299-301). Beginning off the coast of Cornwall on 25 October, the storm grew the next day over the mainland, the North Sea, and then northeast into Scotland before reaching Norway by the 27th (Anderson 110).

WEATHER PREDICTION EDUCATION

Rain is liquid water in the form of droplets that have condensed from atmospheric water vapor and then become heavy enough to fall under gravity. Rain is a major component of the water cycle and is responsible for depositing most of the fresh water on the Earth. It provides suitable conditions for many types of ecosystems, as well as water for hydroelectric power plants and crop irrigation.

A tornado is a rapidly rotating column of air that is in contact with both the surface of the Earth and a cumulonimbus cloud or, in rare cases, the base of a cumulus cloud. The windstorm is often referred to as a twister, whirlwind or cyclone, although the word cyclone is used in meteorology to name a weather system with a low-pressure area in the center around which, from an observer looking ...

Issues What is forecast verification? If we take the term forecast to mean a prediction of the future state (of the weather, stock market prices, or whatever), then forecast verification is the process of assessing the quality of a forecast.. The forecast is compared, or verified, against a corresponding observation of what actually occurred, or some good estimate of the true outcome.

WWRP/WGNE Joint Working Group on Forecast Verification ...
