Electronic health records (EHRs) hold the promise of transforming the health care industry. Over the
past few decades they have gained significant momentum with advances in computer technology,
evidence of improved quality and efficiency of care, and incentive programs that lower the barriers
to adoption and standardization.

Interoperability is an advantage that can't be used easily or at all in a manual system. It means that
many functions can take place and information can be shared using a single data base. This
ensures that regulatory compliance is made easier through the use of electronic health records
(EHR).
