Chapter 14 Lymphatic System Flashcards | Quizlet

The lymphatic system is part of the vascular system and an important part of the immune system, comprising a large network of lymphatic vessels that carry a clear fluid called lymph (from Latin, *lympa* meaning "water") directionally towards the heart. The lymphatic system was first described in the seventeenth century independently by Olaus Rudbeck and Thomas Bartholin.

Lymphatic system - Wikipedia

1. All of the following belong to the lymphatic system EXCEPT lymph. lymphatic vessels. red bone marrow. yellow bone marrow. 2. Which of the following cells produce antibodies?

Lymphatic System Activities & Games | Study.com

Lymph (from Latin, ancient Roman deity of fresh water, *Lympha*) is the fluid that flows through the lymphatic system, a system composed of lymph vessels (channels) and intervening lymph nodes whose function, like the venous system, is to return fluid from the tissues to the central circulation. Interstitial fluid – the fluid which is between the cells in all body tissues – enters the lymph ...

Lymph - Wikipedia

The immune system is the complex collection of cells and organs that destroys or neutralizes pathogens that would otherwise cause disease or death. The lymphatic system, for most people, is associated with the immune system to such a degree that the two systems are virtually indistinguishable.

138 21.1 Anatomy of the Lymphatic and Immune Systems

The lymphatic system is often associated with cancer, so I thought it would be good to alert my readers to some TLC (tender loving care) methods that may prevent some of the more serious disorders that come with toxic lymph glands. The importance of keeping the lymph glands healthy applies to just about all of us: men and women, the young, the middle aged, and the elderly.
