Phlebotomy: A Competency Based Approach

The vestibular system, in most mammals, is the sensory system that provides the leading contribution to the sense of balance and spatial orientation for the purpose of coordinating movement with balance. Together with the cochlea, a part of the auditory system, it constitutes the labyrinth of the inner ear in most mammals. As movements consist of rotations and translations, the vestibular ...

A joint or articulation (or articular surface) is the connection made between bones in the body which link the skeletal system into a functional whole. They are constructed to allow for different degrees and types of movement. Some joints, such as the knee, elbow, and shoulder, are self-lubricating, almost frictionless, and are able to withstand compression and maintain heavy loads while still ...

WHAT IS TELEPHONE TRIAGE? Telephone triage is a complex process by which trained clinicians identify a patient's problem, estimate the level of urgency, and render advice to the patient over the phone (Huibers et al., 2011). Telephone triage, however, does not involve making

diagnoses—nursing or medical—by phone (Lephrohon & Patel, 1995; Perrin & Goodman, 1978).
