Carpentry Unit 8 Floor Framing

1. Find the total rise of the stair The first measurement to determine is the distance between the top and bottom of the stairs. But don't just measure up from below the top landing point; instead, level over approximately to where the bottom of the stair will land (Step 1 in the illustration above). The vertical distance between the bottom and top of the stair opening is Distance X, which in ...

CHAPTER 2 ROOF FRAMING In this chapter, we will introduce you to the fundamentals of roof design and construction. But, before discussing roof framing, we will first review

ROOF FRAMING - Construction Knowledge.net

Framing, in construction, is the fitting together of pieces to give a structure support and shape. Framing materials are usually wood, engineered wood, or structural steel. The alternative to framed construction is generally called mass wall construction, where horizontal layers of stacked materials such as log building, masonry, rammed earth, adobe, etc. are used without framing.

Framing (construction) - Wikipedia
