A relay is an electrically operated switch. Many relays use an electromagnet to mechanically operate a switch, but other operating principles are also used, such as solid-state relays. Relays are used where it is necessary to control a circuit by a separate low-power signal, or where several circuits must be controlled by one signal.

The General Education Development (GED) tests are a group of four subject tests which, when passed, provide certification that the test taker has United States or Canadian high school-level academic skills. It is an alternative to the US High school diploma, HiSET and TASC test. The GED Testing website currently does not refer to the test as anything but "GED".

The fast Fourier transform (FFT) is a discrete Fourier transform algorithm which reduces the number of computations needed for N points from $2N^2$ to $2N \lg N$, where \lg is the base-2 logarithm. FFTs were first discussed by Cooley and Tukey (1965), although Gauss had actually described the critical factorization step as early as 1805 (Bergland 1969, Strang 1993).

Fast Fourier Transform -- from Wolfram MathWorld

Secondary school teachers are more willing to integrate reading and writing strategies in their content-area instruction when they see how these strategies can support their goals for students' understanding.

The Functions of Education Functional theory stresses the functions that education serves in fulfilling a society 's various needs. Perhaps the most important function of education is socialization .If children need to learn the norms, values, and skills they need to function in society, then education is a primary vehicle for such learning.
