Since the sum of the angles in a triangle is 180° , the sum of the angles in the quadrilateral is 360° because it is composed of two triangles. Similarly, we see that the sum of the five angles in the pentagon is 540° since it is composed of three triangles and $3 \times 180^\circ = 540^\circ$. The number of triangles which compose the polygon is two less than the number of sides (angles).
