Therefore, the system has no solution, and the vectors are not parallel. All the equations give  $c = -3$ . Therefore, the system has a solution, and the vectors are parallel. All the equations give  $c = -1$ .

In mathematics, a system of linear equations (or linear system) is a collection of two or more linear equations involving the same set of variables. For example,  $+ - = - + = - - + - =$  is a system of three equations in the three variables  $x, y, z$ . A solution to a linear system is an assignment of values to the variables such that all the equations are simultaneously satisfied.
