Biology | Shara Marshall

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

Biology with Lab - Easy Peasy All-in-One High School

This page shows suggestions of model answers for the A3 revision sheet: topic 1 Cells A3 revision worksheet Of course this sheet will reassure students who are revising but the process of looking up answers is more useful for learning than simply copying answers. Topic 1 Cells - A3 revision sheet model answers.

So What About Water? You might be wondering, why isn't water listed as a limiting factor? After all, along with carbon dioxide, it is one of the factors necessary for photosynthesis.

Limiting Factors of Photosynthesis - Study.com

Class practical This procedure offers a method for measuring the rate of photosynthesis which depends directly on the rate of uptake of carbon dioxide by the photosynthetic organism. Hydrogencarbonate indicator changes colour with pH, which is determined by the concentration of carbon dioxide in solution.

The Student's t-test is a statistical test that compares the mean and standard deviation of two samples to see if there is a significant difference between them. In an experiment, a t-test might be used to calculate whether or not differences seen between the control and each experimental group are a factor of the manipulated variable or simply the result of chance.

In the 17th century a Flemish physician, chemist, and physicist named Jan Baptista van Helmont performed a 5 year study in which he massed the soil of a willow tree in a pot and after 5 years found that the willow had gained a tremendous amount of mass and soil had lost very little. Van Helmont believed that water was the source of the plant mass.
