### **Macroeconomics Old Tests - Austin Community College**

The field of economics known as macroeconomics focuses on the behaviors of a national economy, or a regional economy, as a whole. Macroeconomics is a very general field that concerns itself primarily with large scale indicators, such as unemployment rates, and with the creation of models meant to explain relationships between those indicators. It is also considered the complement to ...

2. Gross Investment, Net Investment, and Depreciation. Can gross investment be negative? Can net investment ever be negative? Answer: Gross investment represents total actual spending on capital goods and can be zero but it can never be negative. Net investment equals gross investment minus depreciation and represents the increase in the stock of useful capital goods.

The correct option is Aggregate. In macroeconomics the term Aggregate refers to an economic measurement of the sum of all final goods and services produced in an economy (supply), expressed as the total amount of money exchanged for those goods and services (demand).. In contrast, the term Inflation expresses a quantitative measure of the rate at which the average price level of a basket of ...

1. Introduction. Do high levels of public debt reduce economic growth? This is an important policy question. A positive answer would imply that, even if effective in the short-run, expansionary fiscal policies that increase the level of debt may reduce long-run growth, and thus partly (or fully) negate the positive effects of the fiscal stimulus.

### **Public debt and economic growth: Is there a causal effect ...**

Contributing to the debate on the macroeconomic effects of fiscal stimuli, we show that the impact of government expenditure shocks depends crucially on key country characteristics, such as the level of development, exchange rate regime, openness to trade, and public indebtedness.
