Geologic Time Study Guide (ANSWERS)

Chromosome, the microscopic threadlike part of the cell that carries hereditary information in the form of genes. A defining feature of any chromosome is its compactness. For instance, the 46 chromosomes found in human cells have a combined length of 200 nm (1 nm = 10⁻⁹ metre); if the chromosomes were to be unraveled, the genetic material they contain would measure roughly 2 metres (about 6 ...

Helpful, trusted answers from doctors: Dr. Sinclair on what causes kidney spasms: Kidney pain is caused classically because of distension or stretching of the renal capsule. This happens with blockages (stones) and infection most commonly. A kidney stone not causing blockage or simple cystitis (uti without kidney involvement) does not typically cause pain.

What causes kidney spasms - Answers on HealthTap

Cancer is a group of diseases involving abnormal cell growth with the potential to invade or spread to other parts of the body. These contrast with benign tumors, which do not spread. Possible signs and symptoms include a lump, abnormal bleeding, prolonged cough, unexplained weight loss, and a change in bowel movements. While these symptoms may indicate cancer, they can also have other causes.

Cancer - Wikipedia

Allergies, also known as allergic diseases, are a number of conditions caused by hypersensitivity of the immune system to typically harmless substances in the environment. These diseases include hay fever, food allergies, atopic dermatitis, allergic asthma, and anaphylaxis. Symptoms may include red eyes, an itchy rash, sneezing, a runny nose, shortness of breath, or swelling.
