How much power is used if the upward force is 15.0N and you do the work in 2.0s? Section 14.1 Assessment. What conditions must exist in order for a force to do work on an object? What formula relates work and power? How much work is done when a vertical force acts on an object moving horizontally?

## **Chapter 14: Work, Power, and Machines**

Chapter 14 Work, Power, and Machines 14.1 Work and Power Work is the product of force and distance. You can calculate work by multiplying the force exerted on the object times the distance the object moves. Work = Force x Distance;  $W = Fd$  Work is done when a force moves an object over a distance. No work is done if an object does not move or if the force you apply is not in the same direction an
