The biggest-ever review of the state of nature on Earth concludes that we are in the midst of an accelerating extinction crisis, with human use of the land and sea resources mostly to blame.

### **Environment News - ABC News**

Health, as defined by the World Health Organization (WHO), is "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity." This definition has been subject to controversy, as it may have limited value for implementation. Health may be defined as the ability to adapt and manage physical, mental and social challenges throughout life.
