1 Computing with Language: Texts and Words. We're all very familiar with text, since we read and write it every day. Here we will treat text as raw data for the programs we write, programs that manipulate and analyze it in a variety of interesting ways. But before we can do this, we have to get started with the Python interpreter.

Connotation. Although writers can make mistakes in denotation, a writer is more apt to miss the right word by misjudging its connotation. Connotation refers to the emotional or psychological associations a word carries with it. The connotation of a word goes beyond its strict meaning to express the feelings, thoughts, and images the word suggests or evokes.
