1. Adlerian Contribution to Contemporary Practice Question from Gil Levin (BOL): Alfred Adler's name is better known to today's therapists than are his ideas and methods. Your dedication to this body of work must be based on the belief that contemporary practice is diminished because Adler's contributions are not fully enough understood or used currently.

Ego psychology is a school of psychoanalysis rooted in Sigmund Freud's structural id-ego-superego model of the mind.. An individual interacts with the external world as well as responds to internal forces. Many psychoanalysts use a theoretical construct called the ego to explain how that is done through various ego functions. Adherents of ego psychology focus on the ego's normal and ...
