Earlier in Lesson 6, four kinematic equations were introduced and discussed. A useful problem-solving strategy was presented for use with these equations and two examples were given that illustrated the use of the strategy. Then, the application of the kinematic equations and the problem-solving strategy to free-fall motion was discussed and illustrated.

Third Grade Math - Mr. Math Blog

Note: Some parts of the repetition syntax below isn't supported in all regular expression implementations. We've so far learned how to specify the range of characters we want to match, but how about the number of repetitions of characters that we want to match? One way that we can do this is to explicitly spell out exactly how many characters we want, eg.

Lesson 6: Catching some zzz's - Learn Regular Expressions

Solution: We have to match only the lines that have a space between the list number and 'abc'. We can do that by using the expression `\d\\.s+abc` to match the number, the actual period (which must be escaped), one or more whitespace characters then the text.. If we had used the Kleene Star instead of the plus, we would also match the fourth line, which we actually want to skip.

RegexOne - Learn Regular Expressions - Lesson 9: All this ...

In the first lesson you will only practice with fingers of your left hand. Place your fingers on the keyboard as described below.
