Hammock Hang Calculator – Web Version. The Hammock Hang Calculator lets you estimate how high to install anchor points for hanging your hammock indoors (or outdoors) and also estimates the horizontal and gravitational forces applied to your hammock system.

Hammock Hang Calculator - The Ultimate Hang

Work Equation. Mathematically, work can be expressed by the following equation. $W = F \cdot d \cdot \cos \Theta$. where F is the force, d is the displacement, and the angle (theta) is defined as the angle between the force and the displacement vector. Perhaps the most difficult aspect of the above equation is the angle "theta."

In the late 1980s, computer scientist Craig Reynolds developed algorithmic steering behaviors for animated characters. These behaviors allowed individual elements to navigate their digital environments in a "lifelike" manner with strategies for fleeing, wandering, arriving, pursuing, evading, etc. Used in the case of a single autonomous agent, these behaviors are fairly simple to ...

A fluid flowing past the surface of a body exerts a force on it. Lift is the component of this force that is perpendicular to the oncoming flow direction. It contrasts with the drag force, which is the component of the force parallel to the flow direction. Lift conventionally acts in an upward direction in order to counter the force of gravity, but it can act in any direction at right angles ...
