Exercises and Problems in Linear Algebra

In mathematics, and more specifically in linear algebra and functional analysis, the kernel (also known as null space or nullspace) of a linear map L : V → W between two vector spaces V and W, is the set of all elements v of V for which L(v) = 0, where 0 denotes the zero vector in W.That is, in set-builder notation, = {∈ | =}.

The divergence of a vector field F, denoted div(F) or del ·F (the notation used in this work), is defined by a limit of the surface integral del ·F=lim_(V->0)($\oint$_SF·da)/V (1) where the surface integral gives the value of F integrated over a closed infinitesimal boundary surface S=partialV surrounding a volume element V, which is taken to size zero using a limiting process.
