I have a bibtex database of optimization references (900K) available online. These are mostly interior point references. A searchable version of this bibliography is also available. I also have an unorganized list of announcements of computational packages that are available for solving a variety of problems. This page is not updated often enough, so some of the links are no longer functional.

A time series is a series of data points indexed (or listed or graphed) in time order. Most commonly, a time series is a sequence taken at successive equally spaced points in time. Thus it is a sequence of discrete-time data. Examples of time series are heights of ocean tides, counts of sunspots, and the daily closing value of the Dow Jones Industrial Average.

1. Introduction. Protein aggregation has been recognized as one of the major challenges in the development and commercialization of successful protein or protein-based drug products (Ross and Wolfe, 2016, Singh et al., 2015, Wang, 2015).In the present context, this may include both reversible self-association and effectively irreversible aggregation.
