Talk is a fundamental way children learn, even before they understand what is being said. Children who come from homes where there are a lot of books and where family members talk about what

they have read, for example, have been shown to have better literacy outcomes in kindergarten and successive grades 1.This same principle holds true for mathematics.

Math anxiety. Mark H. Ashcraft defines math anxiety as "a feeling of tension, apprehension, or fear that interferes with math performance" (2002, p. 1). The academic study of math anxiety originates as early as the 1950s, where Mary Fides Gough introduced the term mathemaphobia to describe the phobia-like feelings of many towards mathematics. The first math anxiety measurement scale was ...
