A Battery Isolator combines the 'house' battery bank that runs your lights, fans, refrigerator, computers and such to your starting battery so it can be charged by your vehicles alternator.. Quick note before we get started. This is just one part of an overarching "How to Install a DIY Camper Van

Electrical System" series. If you've just stumbled on this article directly without seeing ...

How-to Choose a Battery Isolator for a DIY Camper Van ...

In computer science, reference counting is a technique of storing the number of references, pointers, or handles to a resource such as an object, block of memory, disk space or other resource.. It may also refer, more specifically, to a garbage collection algorithm that uses these reference counts to deallocate objects which are no longer referenced. [not verified in body

Reference counting - Wikipedia

All solutions that technology provides must increase the efficiency of the entire system and improve the experience. They must necessarily be easy to deploy, friendly to the user and go beyond the minimum required and forward-looking.

BASIC (Beginner's All-purpose Symbolic Instruction Code) is a family of general-purpose, high-level programming languages whose design philosophy emphasizes ease of use. In 1964, John G. Kemeny and Thomas E. Kurtz designed the original BASIC language at Dartmouth College.They wanted to enable students in fields other than science and mathematics to use computers.

BASIC - Wikipedia

The real lapply() is rather more complicated since it's implemented in C for efficiency, but the essence of the algorithm is the same.lapply() is called a functional, because it takes a function as an argument.Functionals are an important part of functional programming. You'll learn more about them in functionals.. We can apply lapply() to this problem because data frames are lists.
