Hi to all, This is a great post. Im not quite experienced with VBA codes and was very easy to adapt to my needs. however I got a question: I replaced the numbers on the cells with a formula to adjust the max and min values, but when the formula changes the new value, it does not update on the chart, unless I double click-enter on each of the cells.

"The solutions and answers provided on Experts Exchange have been extremely helpful to me over the last few years. I wear a lot of hats - Developer, Database Administrator, Help Desk, etc., so I know a lot of things but not a lot about one thing.

How to express a range in R1C1 format in VBA - faster
I believe this is possible only with VBA. I would also assume that you don't need to check if the autofilter is applied on the correct range (see Further Reading), and that you don't have to check if AUTOFILTER is active or not (i.e. no arrows, no autofilter).. Here's a user-defined function that checks if there are any active filters in a worksheet and, if there are any, displays which ...

Show Excel column filter information in cells - Super User
