Downloading large files or streaming data for long periods causes a home network router to generate heat. In some cases, routers will overheat due to the sustained heavy load. An overheated router will behave unpredictably, eventually disconnecting devices from the local network and crashing.

Troubleshooting Home Network Router Problems - Lifewire

Services - can only be used when generating a new self-signed certificate to define which services (IIS,SMTP,POP,IMAP,UM) will use the new self-signed certificate. Default value for this parameter is set to SMTP (as can be seen in Figure 1), by setting its value to None you can generate a new self-signed certificate without enabling it for any service;

Managing Exchange certificates (Part 3) - TechGenix

This guide is intended for administrators who need to set up, configure, and maintain clusters with SUSE® Linux Enterprise High Availability Extension. For quick and efficient configuration and administration, the High Availability Extension includes both a graphical user interface (GUI) and a command line interface (CLI). For performing key tasks, both approaches (GUI and CLI) are covered in ...
