by mathematical models, and such models may soon become requisites for describing the behaviour of cellular networks. What this book aims to achieve Mathematical modelling is becoming an increasingly valuable tool for molecular cell biology. Con-sequently, it is important for life scientists to have a background in the relevant mathematical tech-

Mathematical Modelling in Systems Biology: An Introduction
by Laurence G. Hassebrook 2-27-2013 We simulate On Off Keying (OOK) modulation and demodulation. The modulated signal is synthesized by using an upsampled random bit stream, modulated by a carrier wave and then corrupted by Additive White Gaussian Noise (AWGN). Assuming no phase error, the modulated signal is demodulated using a mixer configuration.

Some applications. A mathematical model usually describes a system by a set of variables and a set of equations that establish relationships between the variables. Variables may be of many types; real or integer numbers, boolean values or strings, for example. The variables represent some properties of the system, for example,...
